

You Have Our Hallelujah

Recording guidelines

We would love to get as many voices as possible on this recording. Please record yourself singing with video from the second pre-chorus all the way through to the end. You are welcome to sing melody or harmonies but please do not sing ad-libs or change the timing of the lyrics – the aim is to build a choir of voices singing together.

Deadline for sending in recordings is Thursday 19th November

Video

In terms of the filming here's five pointers:

1. Record in landscape
2. Position yourself with good natural light on your face (perhaps near a window)
3. Select a plain background, leaving some distance between you and the background (don't lean up against it)
4. Face the camera squarely, rather than at an angle
5. Leave some headroom between your head and the top of frame, so that your head is never cropped

Audio

A) With recording Gear - if you have it

1. Import the mp3 into your software making sure it starts at bar 1 beat 1 or 0 seconds on the timeline, and use headphones or EarPods. Tempo – 90BPM, 4/4.
2. Start recording audio.
3. Set up a different device with the camera facing you and hit record.
4. Count along with the click and clap on the downbeat (the 4) on the count in of the song. (Make sure the clap is on the audio AND the video!)
5. Send both files (audio & visual) to joe@yeovil.cc – use wetransfer.com

B) if you don't have recording gear

1. You can simply use your phone to film and record audio
2. Listen to the song on another device with headphones or earpods
3. Set up the camera facing you and record – make sure you are recording from before the 2nd pre-chorus to give extra time in the video.
4. Please make sure there is no background noise
5. Send video file to joe@yeovil.cc via WeTransfer or email. Please do not use WhatsApp or Facebook as it compresses the file too much. If you have any issues drop me an email.
